

MR. ROY KORNBLUH is a Senior Research Engineer at SRI International. He has been involved with several projects relating to the development of electromechanical devices and systems. These projects have included the development of a tonometric blood pressure monitoring instrument and automated mail handling systems. For the past ten years, He has focused on the development of electroactive polymer transducers for a variety of commercial and government applications, including the development of flapping-wing MAVs. Mr. Kornbluh received his Masters degree in mechanical engineering from the Massachusetts Institute of Technology

and his bachelors in mechanical engineering from Cornell University. He served as a water and sanitation consultant in Ecuador as a member of the Peace Corps from 1991 to 1994. He serves on the program committee for the SPIE Conference on Electroactive Polymer Actuators and Devices, Actuators 2006 Conference and IASTED Conference on Robotics and Automation.
